

Do you have a sustainability project or idea waiting to happen?

Have you completed a sustainability project at your home, business, school, or organization and want to share so others can follow?

If you said yes to either of these questions... THANK YOU! You are part of the Hanover community helping to meet the town's commitment and driving toward a sustainable future. Sustainable Hanover wants to help you share your project with our community.

We invite you to submit a pitch for presentation at the Sustainable Hanover Forum 2020, Wednesday, April 29th, 6 – 8 pm at Richmond Middle School. Five pitches will be selected to present at the Forum, with up to five minutes for each presentation.

Project pitches are due March 14th by 5pm.

Get the details and apply today. [Click here.](#)

All sustainability projects are welcome. Winning pitches will have a focus that helps the town meet its goals, especially those that touch on one of Sustainable Hanover's three core pillars: Energy, Environment, Community. See some example projects below.

ENERGY | ENVIRONMENT | COMMUNITY

Building Insulation
Energy Storage
Geothermal
Heat Pumps
LED Lighting
Methane
Net Zero Building
Retrofitting
Smart Thermostats
Solar Energy
Wind Energy

Agriculture
Composting
Farmland Restoration
