

Getting to 100% renewable energy in Hanover NH

On May 9, 2017, the Town of Hanover voted to establish a community-wide goal of transitioning to 100 percent clean and renewable energy. The vote defined the goal as 100 percent renewable electricity by 2030 and 100 percent renewable energy for heating and transportation by 2050. Read more about the historic vote at [Green Energy Times](#).

Resources for residents interested in renewable energy:

- [Vital Communities](#) (a nonprofit which serves 69 towns in the Upper Connecticut River Valley of VT and NH) offers information for

those considering installing solar. [Web pages](#) include tips about solarizing, list of local installers, financing etc.

- Solar Power in NH – Part 5 – [Financing a Residential Solar System in NH](#). This September 2017 article takes a look at costs and incentives for installing a residential solar system and includes discussion of NH's net metering rules which were issued June 2017. It is the 5th article in a series about NH solar. Also on this website is a [Solar Payback Calculator](#).
